

KiloVault Announces New Accessory Line for its HLX+ and HAB Batteries

KiloVault®, a provider of innovative and affordable residential and commercial renewable energy solutions, announces a new line of accessories for its HLX+ and HAB lithium batteries.

BOXBOROUGH, Mass. September 21, 2022 -- KiloVault®, a provider of innovative and affordable residential and commercial renewable energy solutions, announces a new line of accessories for its HLX+ and HAB lithium batteries.

The line includes:

- The new HAB Dual Cart Kit supports 2 HAB batteries in one portable, sturdy base. The heavy-duty swivel plate locking casters, and overall ease of installation provide peace of mind and greater convenience for users.
- The new HAB™ Floor Mounted Stand supports the KiloVault® HAB™ 7.5 kWh Lithium Energy Storage System on an elevated, sturdy base. The stand provides a sturdy base where a HAB™ 7.5 battery unit can be permanently installed to keep it off the ground and away from potential water damage. In addition, the Floor Mounted HAB Stand offers easier installation of a KiloVault HAB than wall-mounting.
- New HLX+ Wall Mount Brackets (battery sold separately) are designed to secure one HLX+ Series battery to a load-bearing surface. The HLX+ Mounting bracket securely mounts the HLX+ Series battery to the wall in a repeatable standard installation that will save installers time and cost, and give the installation a clean, professional appearance.

All of the new HLX+ and HAB Batteries accessories are immediately available.

For more information, visit the KiloVault team at Solar Power International RE+, at booth 3938, from Sept. 19-22, 2022 — or access the KiloVault website at <https://kilovault.com>.

About KiloVault

KiloVault® provides innovative and affordable renewable energy solutions for residential and commercial applications, storing the sun, and saving the planet. They design, market, and sell energy storage based on leading-edge technologies that reduce the cost of entry for homeowners and help reduce the impact of humanity on the environment.
